Jim Koehr
Seton School
Manassas, Virginia
coach@koehrfamily.com

Dear Mr Koehr:

Thank you, and everyone involved in the Seton Swimming program, for your ongoing support of the Johns Hopkins CF Center. The annual lap-a-thon raised \$14,099 to support our research program and the ongoing needs of our patients. I truly appreciate the support of the Seton School swim team over the years.

Novel drugs, such as Trikafta, have significantly improved health of children and adults with cystic fibrosis in the past few years. Trikafta is available for children as young as 6 years old and we anticipate that it will be available for younger children early later this year.

Although Trikafta is a wonderful advance for many people with cystic fibrosis but not everyone can benefit from the drug. Therefore, we continue to do research to develop novel approaches to treat everyone with cystic fibrosis. Our recently established a Cystic Fibrosis Center of Excellence continues to grow. This program is developing strategies to apply precision medicine to the care of people with cystic fibrosis. The Center of Excellence will enhance our research efforts and therapeutic approaches for children and adults with cystic fibrosis.

Your continued support is invaluable to help us achieve our goal of improving the lives of children with cystic fibrosis. Please feel free to contact me if I can provide any further information about the Johns Hopkins CF Center or be of any other help in the future.

Sincerely,

A handwritten signature in black ink that reads "Peter J. Mogayzel Jr." in a cursive script.
